WHAT'S NEW IN PANDORA FMS 7.0 NG 717

Este último paquete de actualización de Pandora FMS 7.0 NG, contiene numerosas mejoras y cambios visuales e incluye la resolución de algunos problemas. A continuación mostramos una lista con los cambios más importantes.
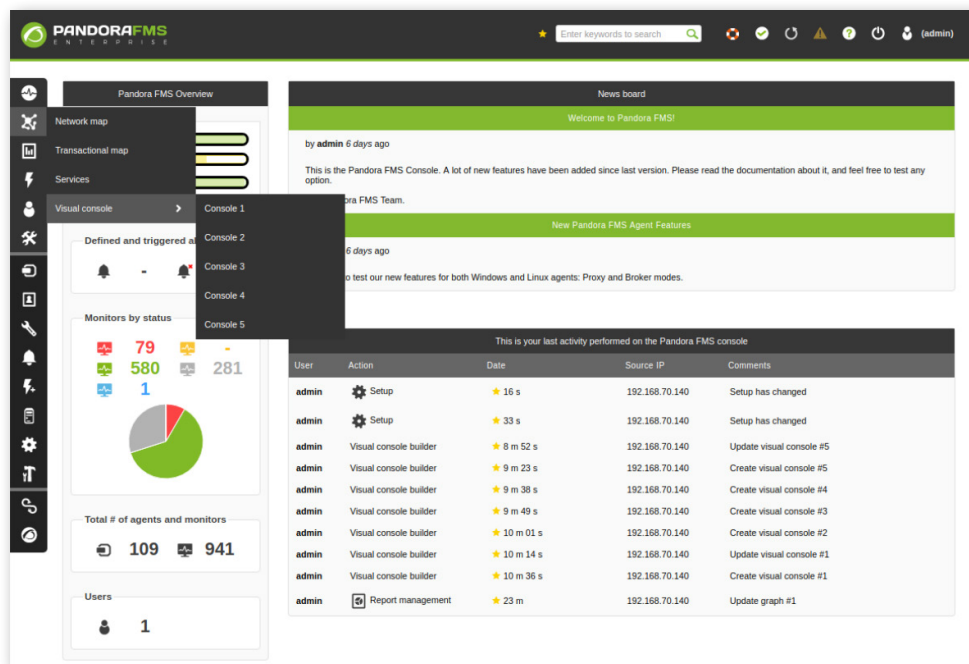

Improvements

* Built-in **alert functionality for modules in unknown status**.

* Update in the **eHorus client**.

* Added the posibility to configure the **timeout of mainframe server FTP connections.**

* Module editing has been optimized through massive operations.

* **Improved user access to custom graphics** depending on permissions.

* Improved **reporting of module events** in metaconsole report templates.

* Added the possibility of selecting the **"auto disable" mode in massive agent operations**.

* Improved the form for editing **web analysis modules (wux).**

* **Favourite visual console functionality** has been improved.

* **Improvements in the syslogserver**, with the possibility of searching the agent reference via IP.

* Optimization of SNMP traps log filtering.

* Improved agent searches in the console tree view and meta console.

* **Including new macros:** use the extra ID of an event externally and get the agent name.

* Improved the **synchronization of metaconsole users** to a node by using profiles assigned to existing groups in the node.

* Including all possible **event macros in the event responses**.

* Deployment of metaconsole synchronization functions using API.

* **Improved tip graphs in console and metaconsole:** including real data options (TIP) and OnlyAVG in "customgraphs" of a graph container, and "show percentile " in combined graphs.

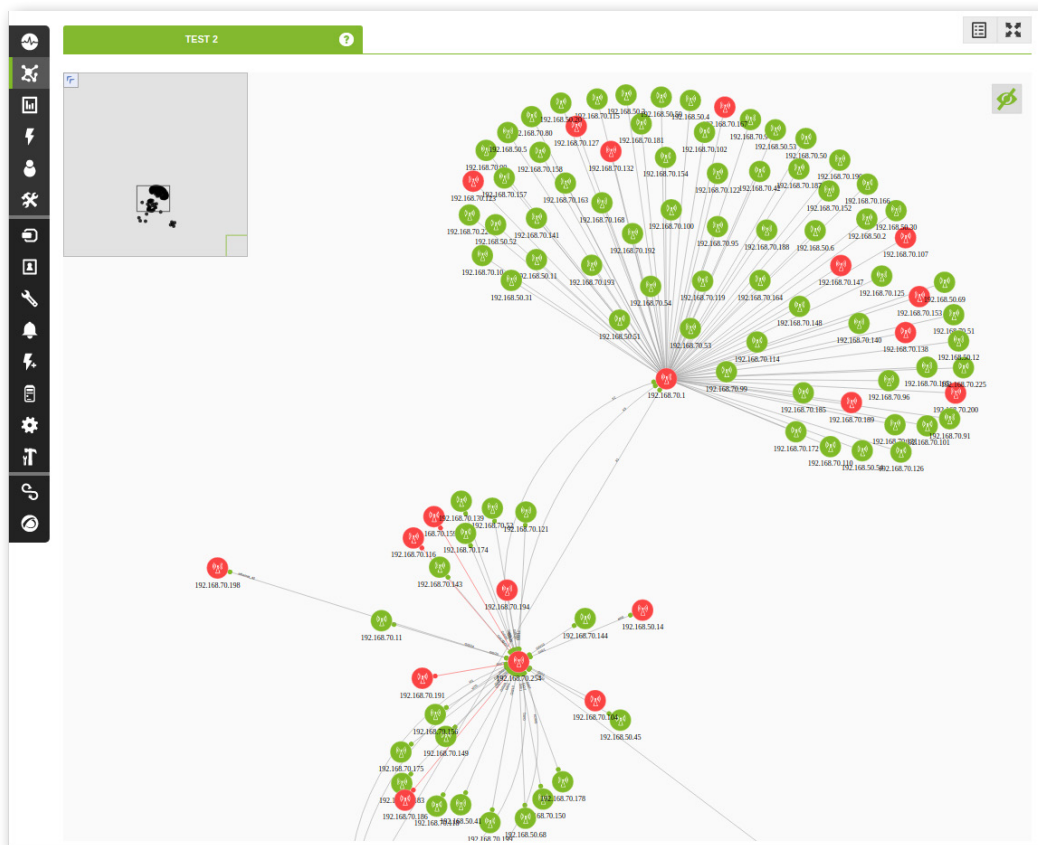

* In order not to allow its deletion, now there's a **feature to have unlocked subgroups when there is only one group in the console that is blocked**.

* The start of the **mobile view** and its filtering agent view has been improved.

* A number of strings have been translated.
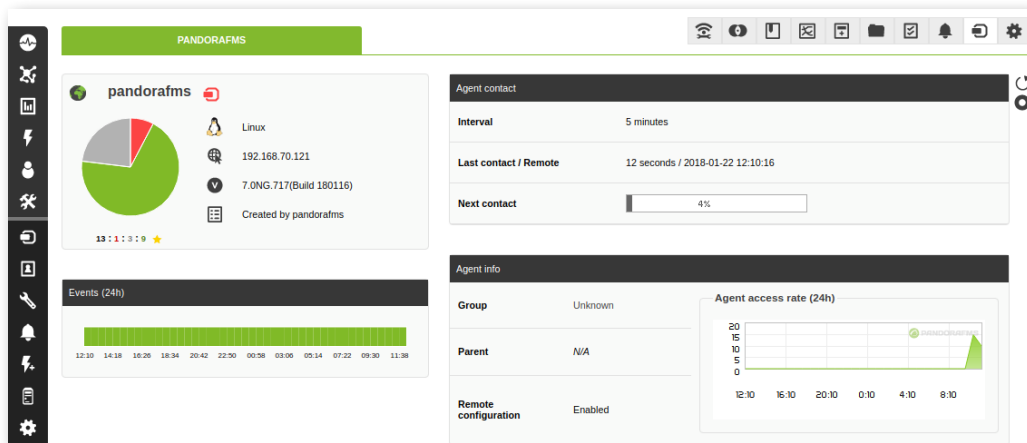

Visual enhancements

*   The **visual aspect of the metaconsole** has been renewed.

*   Changes have been made for a **better visualization of the agent status graphs** when interactive graphs are deactivated.
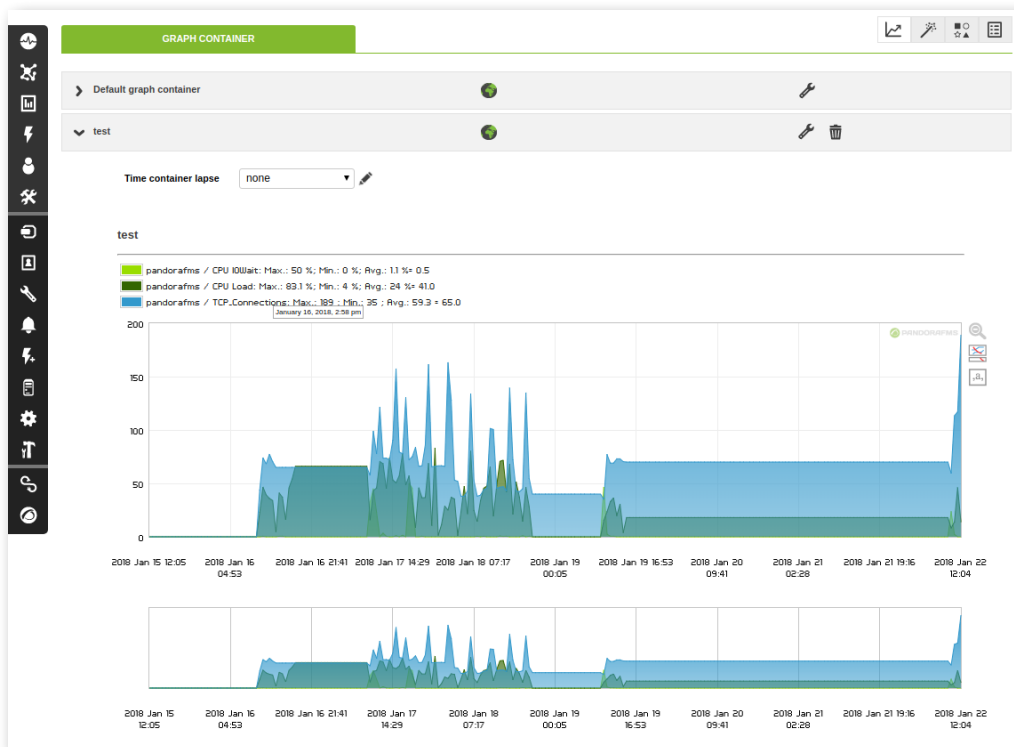

*   Improvements when drawing **network maps**.

*   Optimization in the nomenclature of image files of personalized logos.

*   We have optimized the **presentation of media data in visual styles**.

*   Incorporated a **new visual effect in the login screen** to Pandora FMS.

*   Improved visual aspect of plugin editor fields.

* The **visual appearance of the SLA Wizard** has been improved.

* Changes in the **visualization of dates in the 24h graphs** of the agents.

* Improved visualization of interface graphs in agent view.

* The visualization of the **container graphics overview** has been optimized.

Problems solved

* Solved execution problem of advanced cron type options with synthetic modules.

* Fixed bugs in scheduled tasks.

* Fixed bug when changing the report template information in the metaconsole.

* Fixed bug in the cloning of items in the visual console.

* Fixed problem with interface names display on network maps.

* Fixed bug when creating remote configuration files in agents with empty agent name.

* Fixed error in passwords with SNMP v3 when created via modules or policy instead of using SNMP Wizard interfaces.

* Fixed bug with threads in the export server.

* Solved vulnerability of access to Pandora FMS server.

* Fixed bug in VMware extension.

* Fixed bug in the recursiveness of groups in massive operations.
